

User :

Users will not get any referral commission; they will only get a deposit bonus.

USer will assign levels if they don't join the agent system

This Commission and level system is only applicable if the member does not accept our Agent program.

Levels	Level name	Referrals	Commission
Level 1	VIP 1	0	0%
Level 2	VIP 2	5	0.6%
Level 3	VIP 3	10	0.8%
Level 4	VIP 4	30	1%
Level 5	VIP 5	50	1.2%
Level 6	VIP 6	100	1.5%
Level 7	VIP 7	200	2%

C2C Panel Overview

The **C2C Panel** is a payment management system designed to manage game user deposits, withdrawals.

Merchant Deposit Process

- A merchant first deposits funds into the company's account.
- For example, if a merchant deposits **PKR 100,000**, the admin verifies the payment and credits **PKR 100,000** to the merchant's wallet within the system.
- This balance is then used to process customer deposits and withdrawals.
- If a merchant gives withdrawal to any user the amount will be credited to his C2C panel with **2% commission** on each single verified transaction.

Commission Management

- Merchants earn a commission of **up to 2%** for successfully processing deposits and withdrawals.
- Commission rates, calculations, merchant earnings, and payout management are fully controlled through the **Admin Panel**.
- The admin can configure commission percentages, approve transactions, and monitor merchant performance.

Merchant Levels

- NO levels for the merchant
- Higher-level merchants are allowed to manage larger transaction volumes and maintain higher wallet limits.
- Merchant levels, limits, and permissions are managed entirely by the admin.

Random Account Assignment

- The platform may have **1,000 or more merchants**.
- When a user initiates a deposit within the game, the system automatically assigns and displays a **random active merchant account** for the payment.
- This helps distribute transactions evenly among merchants and prevents overloading a single account.

EasyPaisa Account Management

- Each merchant can register **up to 30 EasyPaisa accounts** within their profile.
- However, **only one EasyPaisa account can be active at any given time**.
- When a merchant activates a new EasyPaisa account, its status changes to **Pending Approval**.
- The account will remain inactive until it is reviewed and approved by an administrator through the **Admin Panel**.
- Once approved, the newly activated account becomes the merchant's active payment account, while any previously active account is automatically deactivated.

Agent System Overview

The **Agent System** is a referral-based commission and salary program designed to reward users who bring active players to the platform.

Agent Eligibility

A regular user becomes eligible for the **Agent Program** after successfully referring **at least 5 new members** who meet the following conditions:

- Each referred member must deposit a minimum of **PKR 1,000**.
- The referred members must remain **active players** on the platform and continue using the system. A one-time deposit alone does not qualify them.
- After verifying these conditions, the **Admin** can manually approve and assign the user as an **Agent** through the Admin Panel.
- Agent can see his referrals in his game account

Referral & Commission System

Once a user is approved as an Agent:

- All qualifying referred members are permanently linked to that Agent.
- The system automatically tracks the activity of every referred member.
- Agents earn commissions based on their referrals' transactions and gaming activity.

Deposit Commission

- There is no deposit commission for the Agent (Referrals)
- The commission percentage should be configurable by the Admin Panel.

Loss/Win Commission

- If a referred member places bets and **loses 100%**, the Agent earns **30% of the net losing amount** as a commission at **level 1**.
- **Level 2 and Level 3 will be only 5%.**
- If the user joined from the Agent link will **win** the bet **30% will** be cut from the Agent Salary on level 1, **5% on level 2 and level 3.**
- Let suppose a member joined from the agent link will win the **1.5 lac or more** on any game bet the same amount will be deducted from Agent salary.
- This percentage should also be configurable by the Admin.

Weekly Salary System

- All commissions earned by an Agent—including deposit commissions and gaming loss commissions—are accumulated throughout the week.
- Daily win/lose salary should be added to the agent account so he can track his salary in the withdrawal option in the game.
- Every **Saturday**, the system automatically calculates the Agent's total earnings.
- The total accumulated commission is then paid to the Agent as their **weekly salary**.

Admin Panel Features

The Admin Panel should provide complete control over the Agent System, including:

- Assign or remove Agent status.
- Configure deposit and loss commission percentages.
- View all referred members and their activity.
- Monitor total commissions earned.
- View daily salary reports.
- Process and manage salary payments.
- Track Agent performance, referral statistics, and transaction history.

This system encourages users to invite active players, rewards Agents based on the performance of their referrals, and automates commission tracking and weekly salary calculations while giving administrators full control over the entire process.

Mentor & Channel Management System

The platform will include a **Channel & Mentor Management System** to organize users, agents, and referrals into structured groups.

Channel Management

- The system will have **10 predefined channels** by default:
 - Channel 1
 - Channel 2
 - Channel 3
 - ...
 - Channel 10
- Only the **Admin** has permission to create, edit, rename, activate, deactivate, or delete channels.
- Each channel can be assigned to **only one Mentor** at a time.

Mentor Management

- Only the **Admin** can create Mentor accounts and assign login credentials.

- The Admin assigns a specific channel to each Mentor.
- Once assigned, the Mentor becomes responsible for managing all users and agents within that channel.

Mentor Referral Link

Each Mentor will receive a unique referral link containing their assigned channel information.

Example:

<zee9game.com/mentor/channel1/{xyz}>

Any user or agent who registers through this referral link will automatically be assigned to the Mentor's channel.

Mentor Responsibilities

A Mentor can manage a large network ranging from **10,000 to 1M users** within their assigned channel.

The Mentor Dashboard should allow them to:

- View all Agents under their channel.
- View all Members (Users) under their channel.
- Search and filter Agents and Members.
- View each member's profile and activity.
- Monitor deposits, withdrawals, betting history, winnings, losses, commissions, and account status.
- View Agent performance and referral statistics.
- Remove or transfer an Agent or Member from their channel (subject to system permissions).
- View channel performance reports and analytics.

Mentor Dashboard

The Mentor Panel should include:

- Dashboard Overview
- Agent Management
- Member Management

- Deposit Reports
- Withdrawal Reports
- Betting Reports
- Winning & Losing Reports
- Commission Reports (Mentor can track his all commission report through his panel.
- Referral Statistics
- Channel Analytics
- Notifications
- Profile & Settings

Mentor Commission

- There is no deposit commission for the Mentors (Referrals)
- Mentor commission rates are fully controlled by the **Admin Panel**.
- The Admin can configure different commission percentages or earning rules for each Mentor.
- The system automatically calculates the Mentor's commission based on the configured settings.
- Mentors can view their commission history, pending earnings, and payment records from their dashboard.

This commission should only be add after member **lose** there bet

- Mentor commission on user loss
- Level 1 : 30%
- Level 2 10
- Level 3 10%

If the user wins, the mentor will lose his salary with the same percentage. **Level 1 30%, Level2 and 3 10%**

Let suppose a member joined from the Mentor channel link will win the **1.5 lac** or more on any game bet the same amount will be deducted from Mentor salary.

Admin Panel Controls for the Mentor Panels

The Admin Panel should provide complete control over the Mentor System, including:

- Create, edit, or delete channels.
- Create, edit, suspend, or remove Mentor accounts.
- Assign or reassign channels to Mentors.
- Reset Mentor credentials.
- Configure Mentor commission percentages.
- Monitor channel performance.
- Transfer users or agents between channels.
- View complete reports for each Mentor, channel, and user activity.
